

## LS-CONSULTANT | Professional

Leading Medical Communications - The Consultants Choice

The Life Stream LS-cP system is specifically designed for the consultants office environments offering the highest quality video and image transfer capabilities, realising the needs of the medical consultants. Offering high resolution image capture and video camera technology the LS-cP provides the capabilities to support all medical disciplines, communicating within campus and around the globe.

The Life Stream LS-Consultant Professional provides the ultimate solution for the consultants office, offering leading medical communications to provide the ability to view remote patient information streamed directly for immediate diagnosis.

The camera provides a full communication and diagnostic session whenever required.

The camera offers great picture quality even in the darkest room conditions, with its low light compensation.

The Graphical User Interface is designed for maximum flexibility enabling bespoke screen layout and operation to be achieved for varying requirements, offering real time manipulation of data within every communication.

The system provides the ideal solution for immediate patient reviews from the consultants office. The image capture input from the medical system displays the information both locally and remotely for full discussion, with quality suitable for full diagnosis.

The LS-cP offers ease of movement between locations, utilising the available space within the hospital environments.

The audio processing is provided by the Market Leading ClearOne, offering state of the art echo cancellation technology.

The touch screen display technology provides easy control and clear image clarity in all light conditions with high quality sound output for those important discussions.

The Life Stream technology has been developed to meet the requirements of the medical consultants for which it is intended, offering ease of use with no boundaries to the medical imaging capabilities in every communication.
